

Building Bridges

Improving Health Through Program Integration

*Chronic disease program integration is the strategic alignment of chronic disease categorical program resources to increase program effectiveness and efficiency while retaining the integrity of individual program objectives.
(Salinsky and Gursky, 2006)*

SAVE THE DATE

June 15 –17, 2010

Wyndham Garden Hotel Woodward Conference Center
3401 South IH-35 Austin, TX 78741 512-448-2444

A limited number of rooms have been blocked for this conference on June 15th and 16th

Meeting Objectives:

- Define and describe public health program integration and clinical integration/care coordination
- Provide examples of program integration activities taking place at national, state, and local levels
- Describe the impact program integration has had at national, state, and local levels
- Identify the differences between partnership, collaboration, and integration
- Provide integration lessons learned, guidance, and successes that can be translated into action
- Provide examples of program integration beyond chronic disease partners to include new social, policy, and environmental program partners

Continuing education for multiple disciplines will be provided for this event

A conference agenda and registration information will be available soon on our conference website at <http://www.dshs.state.tx.us/wellness/buildingbridgesconference.shtm>

Sponsored by the Texas Department of State Health Services in collaboration with dedicated individuals from programs and organizations working to reduce the burden of chronic disease in Texas. For a list of conference planning committee participants, visit the conference website at <http://www.dshs.state.tx.us/wellness/buildingbridgesconference.shtm>
